

# Discrete Applied Mathematics

## Volume 154, Issue 5, 1 April 2006

### Special Issue: IV ALIO/EURO Workshop on Applied Combinatorial Optimization

**Guest Editor:**  
**Celso C. Ribeiro**

## Contents

<i>C.C. Ribeiro</i> Preface	693
<i>C.C. Ribeiro</i> Guest Editor	694
<i>D.J. Aloise, D. Aloise, C.T.M. Rocha, C.C. Ribeiro, J.C. Ribeiro Filho and L.S.S. Moura</i> Scheduling workover rigs for onshore oil production	695
<i>R. Andrade, A. Lucena and N. Maculan</i> Using Lagrangian dual information to generate degree constrained spanning trees	703
<i>J. Blazewicz and M. Kasprzak</i> Computational complexity of isothermic DNA sequencing by hybridization	718
<i>A. Candia-Véjar and H. Bravo-Azlán</i> Worst-case performance of Wong's Steiner tree heuristic	730
<i>A. Caprara, M. Monaci, P. Toth and P.L. Guida</i> A Lagrangian heuristic algorithm for a real-world train timetabling problem	738
<i>I. Charon and O. Hudry</i> Noising methods for a clique partitioning problem	754
<i>P.E. Coll, C.C. Ribeiro and C.C. de Souza</i> Multiprocessor scheduling under precedence constraints: Polyhedral results	770
<i>P. Hansen and N. Mladenović</i> First vs. best improvement: An empirical study	802
<i>L. Markenzon, C.M. Justel and N. Paciorek</i> Subclasses of $k$ -trees: Characterization and recognition	818
<i>I. Méndez-Díaz and P. Zabala</i> A Branch-and-Cut algorithm for graph coloring	826

<i>N.S. Nikolov and A. Tarassov</i> Graph layering by promotion of nodes	848
<i>N.Y. Soma and J.P. Melo</i> On irreversibility of von Neumann additive cellular automata on grids	861
<i>A. Weintraub and A.T. Murray</i> Review of combinatorial problems induced by spatial forest harvesting planning	867
